Protecting your home and family **six** ways

1. 100% waterproof and weather resistant

PVC windows are perfect for homes exposed to strong wind, heavy rain and salty air and never need painting.

2. Environmentally friendly

Our windows are made from 100% recyclable materials, are strong, durable and will never rot or corrode - even in coastal environments.

3. UV Resistant

German engineered specifically for the harsh Australian climate.

4. Safe, secure, superior and stylish!

Achieve effective protection for your home and family from break-ins. Our high security windows and doors that are impact resistant and have hi-tech multi-point locking systems.

5. 100% draft proof

- save on heating and cooling bills

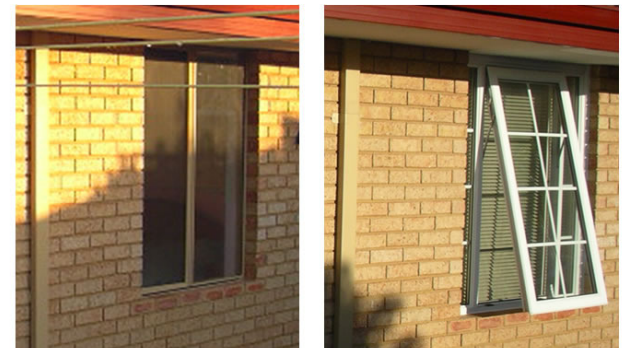

Double glazing means you will enjoy a more comfortable home environment due to its insulating properties. Your home will remain cooler in summer, and warmer in winter.

6. Noise Reduction

The air layers help absorb outside noises and 60% - 70% effective noise reduction is obtainable with various tinted, laminated and toughened glass options.
